### **Applied Sciences Announces Acquisition of Soho Engineering**

**TAMPA, FL, July 1, 2008** - Applied Sciences Consulting Inc. has announced the acquisition of Soho Engineering, Inc. a Tampa-based civil and environmental engineering group serving clients in the commercial, residential and public sectors. The new company will operate under the Applied Sciences' name.

Soho will further strengthen Applied Sciences' environmental engineering practice, particularly in land development and the design and permitting of water and wastewater utilities. Soho's clients have included 7-Eleven, KFC, Pizza Hut, Dunkin Donuts and major automotive dealerships.

"We are delighted to welcome Soho Engineering to the Applied Sciences' family," said Elie Araj, President and CEO. "Our expanded team will allow us to provide clients with a wider range of services, while continuing our core mission of helping clients maximize the triple bottom line with solutions that offer the greatest financial, environmental and community value.

Based in Tampa with operations in St. Augustine, Applied Sciences is a civil and environmental engineering firm specializing in stormwater management and sustainable site development. The company provides flood control design, water quality studies, watershed management plans, water/wastewater studies, environmental permitting, site development, and compliance services to government and commercial clients.
