

New ASCE Journal Keeps Members Current with the Changing Pace of Legal Affairs during Engineering and Construction Practice

New in 2009, the Journal of Legal Affairs and Dispute Resolution in Engineering and Construction, volume 1, issue 1 can be viewed online now for FREE at <http://ascelibrary.aip.org/lao>. Thought-provoking papers cover numerous topics in legal affairs for the knowledge and enlightenment of readers. For instance, Kathleen Harmon's *A Case Study as to the Effectiveness of Dispute Review Boards on the Central Artery/Tunnel Project*, one of the articles in the first issue, explains an important alternative dispute resolution application.

As a crucial technical reference in order to avoid future liability problems and for the success of Engineering and Construction projects, the journal provides insight into the legal relationships arising out of the changing nature of project delivery systems, dispute avoidance and resolution, sustainability concerns, and effective project execution. Editor-in-Chief Amarjit Singh, Ph.D., P.E. of the University of Hawaii at Manoa, with an impeccably credentialed editorial board presents interesting papers written by experienced attorneys and professionals.
