### Symposium on Emerging Developments in Multi-hazard Engineering

September 18, 2007

New York City

A Symposium on Emerging Developments in Multi-hazard Engineering will be organized jointly by AEI and MCEER on September 18, 2007 in New York City at the McGraw-Hill Conference Center. The Steering Committee for the event is co-chaired by Mohammed Ettouney, Ph.D., P.E., Principal, Weidlinger Associates, Inc., and Michel Bruneau, Ph.D., P.Eng., Director of MCEER, and includes representatives from NIST, NSF, FHWA, FEMA, USACE, the State Emergency Management Office of New York State, and The Steel Institute of New York. Further details will be announced in the next issue of AEI's e-newsletter and on the AEI website.

Cooperating organizations include The Infrastructure Security Partnership (TISP), the National Fire Protection Association (NFPA), The Steel Institute of New York, and FEMA.
